adapt[®] 600

The adapt[®] 600 range provides a complete made-to-measure solution as the most adaptable range within the adapt[®] family.

With four backrest and three seat templates to start from, further enhance your chair by selecting what you need from our adaptations[™] options.

As you would expect from adapt[®], the inflatable lumbar air-cell, memory foam seat, seat depth adjuster and free-float mechanism are all included as standard.

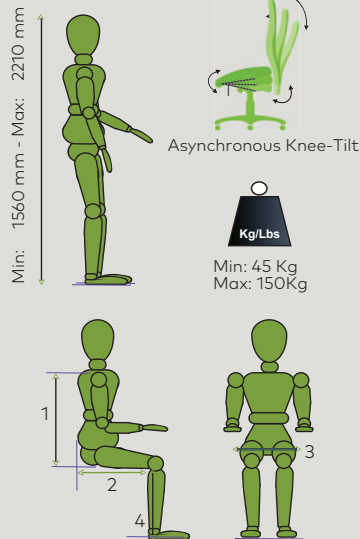

innovative seating

The adapt[®] 600 range offers unlimited **adaptations[™]** in both the dimensions of the chair and the customisation of it.

Sculpting and air-cells can be placed in the exact locations you need them, using the easiSpec[®] system.

* XL and XXL seat options are available in this range to achieve greater width and depth, up to the maximum dimensions shown in the Range Overview.

Our Adapt[®] ranges are now even simpler to specify, using the easiSpec[®] system.

By taking a few simple measurements our Range Selector will help you choose which Adapt[®] range is best for your needs.

The corresponding easiSpec[®] guide will then take you through the **adaptations[™]** steps, such as arm and neck supports and air-cell options, to arrive at your ideal chair prescription.
